

Fair market value link added to PHH InterActive®

May-30-2007

Now generating one or more fair market values is easier than ever. Simply visit the Vehicle Resale area of PHH InterActive, where a newly added link enables you to:

- Enter multiple units and receive fair market values – all in the same session
- Download fair market value information to an Excel spreadsheet

This fair market value functionality is especially useful for various reporting needs when multiple values (i.e., Black Book, PHH-recommended value, and/or client policy) are required or when you need to merge this data into other reports.

Start generating fair market values by visiting PHH InterActive today.
