

PHH FirstFleet enhances truck services with expanded fuel and maintenance networks

Jul-19-2007

Good news if you have medium or heavy trucks and equipment in your fleet: PHH FirstFleet has significantly enhanced its fuel and maintenance services! The expanded fuel and maintenance services complement PHH FirstFleet's other capabilities, which include financing, consulting, acquisition services, remarketing, and accident management.

PHH FirstFleet now offers a **branded fuel card** for trucks with an extensive national network that includes over 7,000 truck stops and 50,000 retail sites for diesel fuel. In addition to the convenience of the new card-based network, the program features consolidated billing, comprehensive reporting, fraud control, and cost management capabilities.

PHH FirstFleet has also launched a **managed maintenance program** that is specifically geared for private truck fleets in all weight classes. It features a broad network of maintenance service including the major OEM parts and service suppliers, with more than 9,000 locations in the US and Canada. Truck drivers now have more conveniently located facilities, 24/7 assistance from PHH's ASE-certified truck specialists, plus a full range of repair, preventive maintenance and warranty services, guaranteed nationwide parts pricing, mobile repairs, national tire pricing and more.

Thanks to PHH InterActive[®], you can track and manage any of your fuel or maintenance purchases to get a comprehensive view of all your costs across your entire fleet.

And, if you operate onsite facilities for your trucks and equipment for fuel or maintenance, PHH can help you incorporate the information from your own facilities into PHH InterActive to get a comprehensive view of your total costs.
