

## PHH enhances security and online tools for PHH/WEX fuel card program

Nov-5-2007

Good news if you subscribe to the PHH/WEX fuel card program: PHH has enhanced security measures through PHH InterActive® and added some new features that benefit both you and your drivers.

### Security measures

Effective November 5, PHH InterActive and PHH WEX fuel card clients will benefit from the following online features:

- Real-Time PHH WEX Card and PIN management\*:
  - Card termination
  - PIN termination
  - PIN re-activation
- Partially masked fuel card numbers in PHH InterActive
- Fuel Transaction Reports display "Charged by" or "PIN used." ('PIN used' is available to users with existing PIN management access.)

*\*Note: Until now, changes to the fuel card have not been real-time, as they are batched overnight for the changes to take place at Wright Express. This change to actual real-time means that transactions will be done immediately - and that means that card termination requests cannot be undone.*

### Additional online tools

Effective November 5 for PHH InterActive and November 12 for PHH InterActive for Drivers, PHH WEX fuel card clients have access to two new tools:

- **Daily Best Fuel Price**
  - Compare accepting fuel merchants to find the best fuel price in an area
  - Search by fuel type (diesel vs. unleaded)
  - Download search results for future reference
- **Real-Time Fuel Price Mapping**
  - View the last fuel transactions price by location
  - View prices that occurred within the last seven days
  - View maps in both satellite and standard map views

All of PHH InterActive's self-guided Learning Videos have been updated to reflect these changes.
