

PHH enhances security and online tools for PHH fuel card program

Nov-7-2007

Good news if you subscribe to the PHH fuel card program: PHH has enhanced security measures through PHH InterActive[®] and added some new features that benefit both you and your drivers.

Security Measures

Effective November 5, PHH InterActive and PHH fuel card clients will benefit from the following online features:

- Enhanced fuel card number security in PHH InterActive:
 - All fuel card account numbers are partially masked to enhance security of card and account information.
- Real-Time PHH WEX Card and PIN management*:
 - Card termination
 - PIN termination
 - PIN re-activation
- Fuel Transaction Reports display "Charged by" or "PIN used." ("PIN used" is available to users with existing PIN management access.)

**Note: Until now, changes to the U.S. fuel purchasing service card have not been real-time, as they are batched overnight for the changes to take place at Wright Express. This change to actual real-time means that transactions will be done immediately - and that means that card termination requests cannot be undone.*

Additional online tools – Available to PHH WEX fuel card clients only

Effective November 5 for PHH InterActive and November 12 for PHH InterActive for Drivers, PHH WEX fuel card clients have access to two new tools for purchasing fuel in the US:

- **Daily Best Fuel Price**
 - Compare accepting fuel merchants to find the best fuel price in an area
 - Search by fuel type (diesel vs. unleaded)
 - Download search results for future reference
- **Real-Time Fuel Price Mapping**
 - View the last fuel transactions price by location
 - View prices that occurred within the last seven days
 - View maps in both satellite and standard map views

All of PHH InterActive's self-guided Learning Videos have been updated to reflect these changes.
