

## Enhancements to PHH InterActive®

Feb-7-2008

PHH Arval continues to invest in its technology tools, including its award-winning client website, PHH InterActive. Beginning today, there are four enhancements that have been developed in response to suggestions by our Client Advisory Board members and built with their hands-on input:

### Find a Report

PHH InterActive contains over 130 standard reports covering every aspect of fleet management. If you aren't sure which of those reports contain the exact information you seek, "Find a Report" makes it easy:

- Simply select a high-level category and check specific fields – the system immediately provides a list of reports that contain that particular information.
- The new functionality allows you to view a sample of the report to make sure it's the one that best suits your needs; you can then run the report and schedule it to be pushed to you on a regular basis.
- PHH clients have said it's a major time-saver in quickly finding and generating the report that matches their needs.

### Screen Capture

You told us you wanted the ability to take information from one part of the site to another. This new feature allows you to capture data from one part of PHH InterActive and take it with you. The Capture function can be accessed through the icon in the upper right-hand corner of the page.

### PHH News

An enhanced news function on the PHH InterActive home page allows you to quickly scan the news section and find the information that's important to you.

### Time Out

This new warning lets you know when you are about to be timed out from PHH InterActive and allows you to re-activate your session.

These enhancements are the latest in a series of initiatives, including the launch of Custom Reporting last year.
