

PHH InterActive® now includes image repository for Canadian accident images

Mar-7-2008

Accessing the images you need to make timely decisions is now easier than ever with PHH InterActive's image repository. In response to client feedback, PHH InterActive now enables clients who subscribe to the Vehicle Accident Services program access to their accident images.

Links to view accident photos may be found on the Vehicle/Driver Details page or by accessing the Accidents section of PHH InterActive. You can also print and download all images from PHH InterActive.

Making these images available via PHH InterActive is just another way PHH is turning your feedback into reality. Log into [PHH InterActive](#) and take a look today.
