

## **PHH Onboard<sup>®</sup> is now available in Canada**

Apr-7-2008

PHH Onboard, PHH's telematics-powered service, is now available in Canada. The offering is integrated with PHH's U.S.-based telematics capabilities, providing a single information platform across borders.

Canadian companies and those with operations in both the United States and Canada can take advantage of the unique insights provided by PHH Onboard to help improve top line revenue, increase driver safety, decrease operating costs and increase driver and vehicle productivity. PHH Onboard combines:

- Advanced in-vehicle telematics technology
- Actionable reporting, management tools and scorecards which integrate telematics data and fleet information
- PHH Arval's consultative expertise and program management

PHH Onboard delivers customized, end-to-end telematics solutions, designed to meet a wide range of unique business needs. The service can help fleets increase the number of productive stops, reduce idle time, dispatch the nearest resource, eliminate speed violations, and improve safety and the fleet's risk profile. PHH Onboard includes consultation with business leaders in your organization, creation of a Return on Investment (ROI) model, program management, telematics device logistics, robust reporting, exception management, and results and trend analysis.

PHH is partnering with multiple telematics suppliers to provide full coverage throughout Canada and a wide range of features, including driver identification keys, integration with Windows CE-based technology (both in-vehicle and driver hand held), and the ability to collect data from a variety of vehicle sensors such as seat belts, doors, and more.
