

PHH recommends use of Electronic Funds Transfer

Apr-23-2008

If you are not already making your payments via Electronic Funds Transfer (EFT), you might want to consider the following advantages:

- EFT payments are less costly than printing and mailing checks.
- EFT payments are automatically and securely deposited into your designated vendor's bank account. This prevents opportunities for misrouting, theft and forgery.
- EFT provides a quicker path for invoice payment, as funds generally clear within two days of your release.

If you decide to make your payments electronically, please select the CTX format of ACH payment. This will allow you to pay a vendor for multiple invoices using a single payment, and it includes full remittance information. Please use the full ten-digit invoice number on your remittance information to ensure payments will be processed in a timely manner.

If you have any questions or need assistance, please contact your PHH Account Team.
