PHH Onboard®

PHH Onboard is a unique telematics and vehicle diagnostics service designed to help you reduce your fuel, maintenance and accident costs while providing you with the tools to dramatically boost driver productivity.

Get the insight you've been missing

Increasing productivity: Are your drivers spending the right amount of time with the right customers? Is every driver hour productive? How does actual activity compare to reported activity?

Improving your corporate risk profile: Monitor and eliminate excessive speed. Improve seat belt utilization. Reduce unauthorized use.

Reducing fleet operating costs: Reduce fuel expense and greenhouse gas emissions by managing idling. Reduce maintenance costs through proactive diagnostic trouble code monitoring. Reduce mileage driven to improve lifecycle costs

Useful information leads to proactive management

PHH Onboard clients are achieving:

- 62% reduction in idle time
- 9.3% improvement in fuel efficiency
- 87% reduction in speeding above 75 mph
- 82% improvement in seat belt utilization
- 46% reduction in miles traveled per stop
- 70% increase in number of stops
- 84% reduction in after-hours mileage
- 30 minutes per day reduction in overtime

PHH's Onboard consulting team can help you put information into action by analyzing real-time data, talking to drivers to identify exceptions, and recommending policy improvements.

We give you information that increases your return on investment and helps make key decisions about your business.

Using real-time vehicle diagnostic and location information, PHH service professionals can address vehicle issues proactively to manage costs and enhance vehicle performance.

And we deliver customized scorecards on key performance indicators and driver behaviors to maximize the value of the PHH Onboard service

It's not just a matter of installing technology in a vehicle. It's understanding the resulting information and putting it into action.

Key differentiators

- **In-cab active management tool** alerts drivers real-time when they exceed preset speed, idle time or harsh braking parameters.
- **Integrated services and reports** incorporate traditional information with telematics data for a holistic approach to managing fleet drivers.
- **Consulting** from your dedicated PHH Onboard Consultant helps you make sense of all the data and information.
- **Administration management** of entire process includes ordering and monitoring through deactivating cellular service/fees.
- **Advanced analysis of vehicle data** includes everything from engine performance to critical events such as accidents, fuel fraud, seat belt usage, off-road usage (IFTA) and many others.
